## PROFESSIONAL SUMMARY

### Java Backend Developer Worked for an Insurance Client

02/2020 - 03/2023

#### Roles and Responsibilities/Tasks

- Key role in developing scalable backend REST APIs using Spring Boot framework that aligned with client's objectives and adhered to industry standards.
- Three-plus years experience developing server-side software using Java technologies, including Core Java, Spring Boot, Spring REST, MVC, Web Flux, JPA, and Oracle PL/SQL, with a focus on efficient implementation, quality, and performance.
- Deploying a scalable and reactive event-driven methodology to implement the client's business requirements in a manner that meets their specific needs and objectives.
- Conducting a thorough analysis of the client's business requirements and subsequently developing a proof of concept that aligns with their objectives.
- Interfacing with stakeholders to gather requirements, provide updates on project progress, and ensure timely delivery of projects.
- Creating and maintaining technical documentation for developed systems and applications.
- Conducting code reviews, debugging and troubleshooting issues, and ensuring code quality and performance.
- Collaborating with cross-functional teams to develop and integrate features.
- Staying up to date with emerging technologies and industry trends to continually improve skills and knowledge.
- Ensuring that all development processes and methodologies are followed while adhering to industry standards and best practices.
